Hi Tom.

It looks like WECA gas information regarding the FOIA we discussed.

Erik

Good morning Patrick. I hope your day is going well.

GWDW drinking is preparing a no records response for the FOIA below.

However, Tom Poy asked me to run the request by WECA just in case you might have responsive records.

"The Department of Agriculture, Trade and Consumer Protection respectfully requests the results of all laboratory testing for nitrate and/or pesticides of private drinking water wells collected by staff from EPA-Region 5, between the dates of August 1, 2017 to December 31, 2017 from homes and/or businesses located in the Towns of Armenia in Juneau County and/or Port Edwards in Wood County, Wisconsin. We request analytical results, sample collection dates, and address locations. If address locations are viewed as private information and redaction is required, then we request sample locations be otherwise identified in the form of an acceptable criteria like nearest quarter-quarter section, township, range, section number and county name, GPS coordinates, or other locational criteria. Our agency regulates contamination of groundwater with pesticides associated with point source spills and non-point labeled uses, as well as fertilizer contamination of groundwater associated with point source spills. This information will enable us to determine whether additional investigative actions are necessary in the area sampled by EPA, for the benefit of protecting the health and welfare of Wisconsin citizens who rely on drinking water in the area."

Thank you!
